

### Current research

- Topic: A multimethod approach to mitigating apathy among people with and without brain disorders in the Canadian long term care facilities.
- Methodology: Mixed method
- Expected outcome: Identify risk factors for apathy in the Canadian long term care facilities

## About me

**Aderonke Agboji**  
PhD student in Health Sciences  
University of Northern BC

Enjoy working with number, cooking and shopping. I love flowers

### Career Development

Apply the skills learnt to:

- Complete my dissertation project
- Write application and secure funding for my postdoc
- Mentor others

### Goal for the SPA

- Network with people with similar interest
- Learn from experts in aging
