

# Lucas, a french guy in Montreal

## About me

Ph.D candidate in biomedical sciences, University of Montreal, QC, Canada  
Teaching assistant, Neuropsychologist

Think I love academic studies (You're kidding me?)  
Hobbies : Cooking and baking  
Best failed: burn pasta and melt a spatula in caramel (Done!)

Photo model (Proof below)

## Career Perspectives

In an ideal world, to be able to compile university teaching, research, and clinical care work, outside of any productivity principle  
To found an ecovillage based on the social, economic and ecological principles of communism  
+ find time to improve my cooking skills...

## Goal for the SPA

Become autonomous in the creation and exploitation of longitudinal research paradigms  
Learn new strategies for statistical, probabilistic or algorithmic analysis  
Address new issues related to aging

## Current Research

• Doctoral thesis:  
The predictive role of neuropsychiatric symptoms in age-related cognitive decline, anatomical and functional brain substrates and analysis of large databases. CRIUGM, Montréal

### Other collaborations with:

- Neurology and neuropsychology department, Timone hospital, Marseille, France
  - Pediatric emergency department, APHP, Paris, France
- GIGA CRC In vivo Imaging - Aging & Memory, Liege University
